Bath Bombs & Tablets

Design Technology

Make a press

Pressing the mixed ingredients into the mould is a very important part of the process. Can you design a machine to help you? How will you test its effectiveness? You'll need to consider:

- Holding the mould

- Filling the mould

- Pressing the mixture evenly & firmly

Extension—Quality Control

Your products must not break up during packaging or transport. How could you test your products to see how hard they are? Can you design a tool to measure how hard or soft your products are?
