Skeleton Dice Game

Every player needs a skeleton sheet & a standard die.

Everyone rolls at the same time, every time. The winner is the first to complete their skeleton.

Roll a 6 to start: the ribcage is placed first.

Add bones as you roll the numbers shown ... **each bone MUST connect to a bone already placed.**

Eg you must have the lower arm before you can place a hand, and must have the upper arm before you can place a lower arm. You need the pelvis before you can place an upper leg.

Either colour in the 1st page for a single-use game, or print both sheets onto card and cut-out-and-keep the bones below for repeated play.
